Student Senator Tara Chatteraj wants medical marijuana allowed in University housing.

Chatteraj introduced a resolution to the Student Government Wednesday, that would urge changes to the Student Code and Housing regulations.

Illinois allows for people with a debilitating condition to apply for the cannabis registry and purchase medical marijuana.

Currently marijuana is not allowed on campus because the drug is federally illegal and public universities have concerns about loss of funding.

“I need it to function,” said senior in Media, Jack Block. Block has a prescription for marijuana and broke the rules last year to use it.
