Interview Update

Do students at University of Illinois at Urbana-Champaign feel safe in their dorms?

The people that I interviewed:

Jasmine Atkins : Overall, Jasmine feels safe in the dorm. She begins to talk about how she notice that the students hold the door for other people, not knowing if they are a stranger or not. She believes that this is out of the campus control.

Chelsea Ward Perkins: Overall, Chelsea does not feel safe in the dorm. She feels as if the police is always at FAR. Also, she does not like how people are holding the door for others because she feels as if a stranger could come straight to her room.

Thomas: He feels not safe living in FAR at times. He says because the police is constantly at FAR so that means something bad has happened. But overall, he knows that he will be straight.

Sources:

I can talk to the RAs and see their outlook.

Talk to other students outside of FAR.

Look up past things that has happened in the dorms.

I believe that I overall should talk to way more students around the campus. Also, make sure that

I talk to other students from different cultures. I need to visit other dorms and get their insight.

Also, I believe that research is an important thing to do, to see what has already happened in the dorms.
